Getting Started

What is this tool?

The Competitor Intelligence Profiler analyzes your competitors across **74 data points** to give you actionable insights about their business, marketing, SEO, and online presence.

What you'll get:

- **Competitor profiles** with contact info, traffic estimates, SEO metrics
 - **Keyword analysis** showing what topics they focus on
 - **Mention tracking** revealing where they're being discussed
 - **Technical insights** about their website performance
 - **Social media presence** across all major platforms
 - **Business intelligence** including reviews, ratings, and growth signals
-

Understanding Your Data

Your CSV File Contains 74 Columns Organized Into 9 Categories:

Category	# of Columns	What It Tells You
Basic Information	7	Who they are, where they're located
Contact & Communication	3	How to reach them, their email/phone

Category	# of Columns	What It Tells You
Keyword Intelligence	3	What topics they focus on
Web Mentions & Brand Tracking	9	Where they're being talked about
Google Business Profile	8	Local presence, reviews, ratings
Website & SEO Metrics	15	How visible they are in search
Social Media Presence	6	Their social media footprint
Technical & Performance	10	Website quality and technical setup
Competitive Intelligence	13	Market position, growth signals

Category Breakdown

 1. BASIC INFORMATION

What it is: Core identifying information about the competitor.

Column	What It Means	How to Use It
name	Company/business name	Primary identifier for the competitor
address	Physical location	See if they're local, regional, or national
domain	Website domain (e.g., company.com)	Visit their site for deeper research
url	Full URL where data was found	Original source of information
title	Page title from search results	See how they position themselves
query	Your original search query	Remember what you searched for
source	Where data came from (web_scraping/google_cse)	Understand data reliability

 Use Case Example:

You search "real estate investors jacksonville fl" and find 12 competitors. Sort by **address** to see which ones are actually in Jacksonville vs. serving it remotely.

2. CONTACT & COMMUNICATION

What it is: Ways to reach the competitor or monitor their communications.

Column	What It Means	How to Use It
phones	Phone numbers found on their site	Call for mystery shopping or market research
emails	Email addresses discovered	Contact for partnerships or monitoring
email_patterns	Common email formats (@domain.com)	Guess employee emails for outreach

Use Case Example:

Use **phones** to call as a prospect and evaluate their sales process. Use **emails** to sign up for their newsletter and monitor their marketing campaigns.

3. KEYWORD INTELLIGENCE (NEW!)

What it is: The topics and keywords your competitors focus on.

Column	What It Means	How to Use It
top_keywords	Top 20 single keywords they use most	Topics they focus on (e.g., "investment, property, rental")
top_phrases	Top 10 two-word phrases	Their key messages (e.g., "passive income, cash flow")
keyword_density_top5	Most frequent keywords with counts	See emphasis (e.g., "investment:45" means "investment" appears 45 times)

Use Case Example:

Competitor uses "passive income" 35 times but you never mention it. This reveals a messaging gap you should fill. Create content around passive income to compete.

Strategic Actions:

- **Content Ideas:** Use their top_keywords to find topics you're missing
- **SEO Gaps:** If they rank for keywords you don't mention, add those to your site
- **Ad Copy:** Use their top_phrases in your Google Ads for competitive conquering

4. WEB MENTIONS & BRAND TRACKING (NEW!)

What it is: Where and how often your competitors are being discussed online.

Column	What It Means	How to Use It
mention_count_total	Total web mentions found	Overall brand awareness indicator
mention_count_social	Mentions on Facebook/Twitter/LinkedIn	Social media buzz level
mention_count_news	Mentions in news articles	PR and media coverage
mention_count_reviews	Mentions on Yelp/BBB/review sites	Customer feedback volume
mention_count_forums	Mentions on Reddit/Quora/forums	Community discussion level
mention_urls_social	Actual URLs of social mentions	Visit to see what people say on social
mention_urls_news	URLs of news articles	Read press coverage about them
mention_urls_reviews	URLs of review sites	See customer reviews and complaints
mention_urls_forums	URLs of forum discussions	See unfiltered opinions about them

Use Case Example:

Competitor has 45 news mentions while you have 3. Click **mention_urls_news** to see which publications cover them. Pitch those same journalists your story.

Strategic Actions:

- **PR Strategy:** If they have high news mentions, investigate their PR tactics
- **Reputation Management:** Check review mentions to see common complaints
- **Community Engagement:** High forum mentions? They're active in online communities
- **Partnership Opportunities:** Social mentions might reveal influencer partnerships

 **Set Up Alerts:** Visit <https://www.talkwalker.com/alerts> and create alerts for:

- Competitor brand names
 - Their top keywords
 - Their executives' names Get notified instantly when they're mentioned online!
-

5. GOOGLE BUSINESS PROFILE DATA

What it is: Information from their Google Maps/Local listing.

Column	What It Means	How to Use It
g_name	Business name on Google	Official business name
g_address	Address from Google Maps	Verified physical location
g_phone	Phone from Google listing	Primary contact number
g_rating	Google star rating (0-5)	Overall customer satisfaction
g_reviews	Number of Google reviews	Review volume (more = more established)
g_latitude	Map latitude coordinate	Plot on a map to see coverage areas
g_longitude	Map longitude coordinate	Geographic analysis
g_status	Business status (OPERATIONAL/CLOSED)	Whether they're still active

Use Case Example:

Sort by **g_rating** descending. The top competitor has 4.8 stars and 250 reviews. Read their reviews to see what customers love and replicate it.

Strategic Actions:

- **Review Analysis:** Click reviews to find strengths/weaknesses
- **Local SEO:** If they have high reviews, invest in getting more reviews yourself
- **Service Gaps:** Negative reviews reveal what they do poorly = your opportunity

6. WEBSITE & SEO METRICS

What it is: How well they rank in search engines and their SEO strength.

Column	What It Means	How to Use It
word_count	Total words on their homepage	Content depth indicator
indexed_pages	Pages indexed by Google	Site size (more = more authority)
backlinks	Number of links pointing to their site	SEO authority level
referring_domains	Unique sites linking to them	Link diversity (higher = better)
domain_authority	SEO authority score (0-100)	Overall SEO strength
trust_flow	Link quality score	Trustworthiness of their backlinks
citation_flow	Link quantity score	Volume of backlinks
directory_count	Business directory listings	Local SEO presence
h1_tags	Main headings on page	SEO structure quality
meta_description	Page description for search	How they attract clicks
robots_txt	Robot instructions	Technical SEO setup
sitemap	XML sitemap presence	Search engine accessibility
title_tag_length	Title character count	SEO optimization (50-60 is ideal)
meta_desc_length	Description character count	SEO optimization (150-160 is ideal)
page_load_speed	Load time in seconds	User experience quality

💡 Use Case Example:

Competitor has **domain_authority: 65** and **backlinks: 5,200** while you have DA 28 and 400 backlinks. They're crushing you in SEO. You need a link building strategy.

🎯 Strategic Actions:

- **Content Strategy:** Low word_count = opportunity to outrank with deeper content
- **Link Building:** High backlinks? Study their link profile with Ahrefs/Moz
- **Directory Listings:** Low directory_count? Easy wins by listing in the same directories
- **Technical SEO:** Compare title/meta lengths to optimize your own pages

7. SOCIAL MEDIA PRESENCE

What it is: Their social media accounts and activity.

Column	What It Means	How to Use It
facebook	Facebook page URL	Follow to monitor their posts
twitter	Twitter/X profile URL	See their messaging and engagement
linkedin	LinkedIn company page	Professional content and hiring signals
instagram	Instagram profile	Visual content strategy
youtube	YouTube channel	Video marketing presence
social_summary	Overview of social presence	Quick snapshot of their social footprint

Use Case Example:

Competitor has active Instagram (1,000+ posts) but you don't use Instagram. They're reaching an audience you're missing. Start an Instagram account.

Strategic Actions:

- **Content Inspiration:** Follow their social accounts to see what content works
- **Posting Frequency:** Check how often they post to benchmark your own activity
- **Platform Priority:** Focus on platforms where they're most active
- **Engagement Tactics:** See what posts get the most likes/comments

8. TECHNICAL & PERFORMANCE

What it is: Website quality, speed, and technical infrastructure.

Column	What It Means	How to Use It
mobile_friendly	Works well on phones	Mobile optimization status
ssl_certificate	HTTPS security enabled	Site security level
page_load_speed	Load time in seconds	User experience (under 3s is good)
performance_score	Overall speed score (0-100)	PageSpeed Insights score
first_contentful_paint	Time to first content (seconds)	Perceived speed
canonical_tags	Duplicate content handling	SEO technical setup
open_graph_tags	Social sharing optimization	How links look when shared
schema_markup	Structured data presence	Rich snippets in search
header_structure	H2/H3/H4 heading hierarchy	Content organization quality
content_freshness	Last updated date	How often they update content

 Use Case Example:

Competitor's **page_load_speed: 1.2s** vs. your **4.5s**. Their site loads 3x faster. Users are more likely to stay. Optimize your site speed immediately.

 Strategic Actions:

- **Speed Optimization:** Slow load speed? They're losing customers. Outperform them with faster hosting
- **Mobile Priority:** No mobile_friendly? Huge opportunity if you're mobile-optimized
- **Technical SEO:** Missing schema_markup? Add it to your site for better search visibility

 9. COMPETITIVE INTELLIGENCE

What it is: Market position, growth signals, and business health indicators.

Column	What It Means	How to Use It
traffic_estimate	Estimated monthly visitors	Relative traffic volume
confidence_score	Data quality score (0-100)	How reliable this data is
hiring_signals	Hiring activity score (0-1)	Are they growing? (0.7 = active hiring)
hiring_growth_signal	Growth trend score (0-1)	Expansion indicator
reviews_bbb_signal	BBB review presence	Established business indicator
reviews_google_signal	Google review activity	Customer feedback presence
reviews_yelp_signal	Yelp review presence	Consumer review activity
ai_analysis	AI-generated competitive insights	Strategic recommendations
strengths	Identified competitive advantages	What they do well
weaknesses	Identified vulnerabilities	Your opportunities to compete
opportunities	Market gaps they could fill	Threats to watch
threats	Risks to their business	Your competitive advantages
strategy_recommendations	Suggested actions	How to compete effectively

💡 Use Case Example:

Competitor has **hiring_signals: 0.9** and **traffic_estimate: 75,000**. They're rapidly growing. Read their **ai_analysis** to understand why and counter their strategy.

🎯 Strategic Actions:

- **Market Positioning:** High traffic? Study what's working for them
- **Growth Monitoring:** High hiring signals? They're expanding - prepare for increased competition
- **Weakness Exploitation:** Read **weaknesses** column to find gaps you can fill
- **Strategic Planning:** Use **strategy_recommendations** for actionable next steps

How to Use Each Category

SCENARIO 1: You Want to Steal Their Customers

Follow this workflow:

1. **Check Reviews** (g_rating, g_reviews, reviews_*)
 - Sort by lowest rating
 - Read negative reviews
 - Find common complaints
 - Advertise that you solve those problems
2. **Analyze Keywords** (top_keywords, top_phrases)
 - See what they rank for
 - Create better content on those topics
 - Use their keywords in your Google Ads
3. **Study Mentions** (mention_urls_reviews, mention_urls_forums)
 - Visit review sites
 - See what customers complain about
 - Position yourself as the solution

Example:

Competitor has g_rating: 3.2 with complaints about "slow response times" in reviews. Your ad: "Need faster service? We respond in under 2 hours, guaranteed."

SCENARIO 2: You Want to Outrank Them in SEO

Follow this workflow:

1. **Assess SEO Gap** (domain_authority, backlinks, indexed_pages)
 - Compare your metrics to theirs
 - If they're way ahead, this will take time
 - If you're close, you can catch up quickly
2. **Keyword Opportunities** (top_keywords, top_phrases)
 - Extract their keywords
 - Search for those keywords in Google
 - Create better, longer content than theirs

3. **Build Better Links** (referring_domains, directory_count)
 - Get listed in the same directories
 - Find sites linking to them (use Ahrefs)
 - Reach out for links to your site
4. **Technical Wins** (page_load_speed, mobile_friendly, schema_markup)
 - Beat them on speed (faster = better SEO)
 - Ensure your site is mobile-friendly
 - Add schema markup for rich snippets

Example:

They rank for "real estate investment Jacksonville" with domain_authority: 35. You have DA 28. Write a 3,000-word guide on that topic (vs. their 1,200 words) and build 10 backlinks to it.

 SCENARIO 3: You Want to Monitor Their Growth

Follow this workflow:

1. **Traffic Benchmark** (traffic_estimate)
 - Note their current traffic
 - Re-run profiler monthly
 - Track if they're growing or shrinking
2. **Growth Signals** (hiring_signals, hiring_growth_signal)
 - High scores = they're expanding
 - Monitor their LinkedIn for job postings
 - Prepare for increased competition
3. **Content Activity** (content_freshness)
 - See when they last updated
 - Frequent updates = active marketing
 - Rare updates = opportunity to outpace them
4. **Social Momentum** (facebook, twitter, linkedin)
 - Follow their social accounts
 - Track follower growth
 - See what content performs well

Example:

January: traffic_estimate: 50,000, hiring_signals: 0.3 March: traffic_estimate: 75,000, hiring_signals: 0.8

Action: They're growing fast! Double down on your marketing before they dominate the market.

SCENARIO 4: You Want to Find Partnership Opportunities

Follow this workflow:

1. **Identify Strong Players** (domain_authority, g_rating, traffic_estimate)
 - Sort by highest scores
 - These are established, credible businesses
 - Good partnership candidates
2. **Check Compatibility** (top_keywords, ai_analysis)
 - Do they serve the same market but different need?
 - Example: You do mortgages, they do property management
 - Complementary = partnership opportunity
3. **Contact Them** (emails, phones, linkedin)
 - Use contact info to reach out
 - Propose referral partnership
 - "You refer mortgage clients to us, we refer property management to you"

Example:

You find a competitor with traffic_estimate: 100,000 and top_keywords includes "property management" (which you don't offer). Partner with them to cross-refer clients.

SCENARIO 5: You Want to Create Better Content

Follow this workflow:

1. **Topic Analysis** (top_keywords, top_phrases)
 - See what topics they focus on
 - Identify gaps in your content
2. **Content Depth** (word_count, h1_tags, header_structure)
 - See how deep their content goes
 - Create longer, more comprehensive content

3. **Keyword Density** (keyword_density_top5)

- See which keywords they emphasize
- Match or exceed that emphasis

4. **Content Freshness** (content_freshness)

- Old content? You can outrank with fresh content
- Fresh content? You need to update more frequently

Example:

They have 800-word blog posts on "real estate investing tips". You create a 3,000-word ultimate guide with more detail, better structure, and fresh 2025 data.

Strategic Analysis Tips

How to Prioritize Competitors

Tier 1 - Direct Threats (Focus Here First):

- High traffic_estimate (over 50,000/month)
- High domain_authority (over 40)
- High g_rating (4.0+) with many reviews
- Same geographic location (address field)
- Similar top_keywords to yours

Tier 2 - Growing Competitors (Monitor Closely):

- High hiring_signals (over 0.7)
- Frequent content_freshness updates
- Growing mention_count_total
- Active on social media

Tier 3 - Aspirational (Learn From):

- Very high domain_authority (70+)
- Massive traffic_estimate (200,000+)
- Excellent g_rating with thousands of reviews
- Study but don't directly compete yet

Tier 4 - Weak Competitors (Easy Wins):

- Low g_rating (under 3.5)
 - Low domain_authority (under 20)
 - Few indexed_pages
 - Steal their customers by being better
-

Monthly Monitoring Routine

Week 1:

- Re-run competitor profiler
- Compare new data to last month
- Track changes in traffic_estimate, g_reviews, hiring_signals

Week 2:

- Visit mention_urls from all categories
- Read new reviews, news articles, forum posts
- Note any PR wins or reputation issues

Week 3:

- Check their social accounts (facebook, twitter, linkedin)
- See what content they posted this month
- Identify trends in messaging

Week 4:

- Update your strategy based on findings
 - Create content targeting their top_keywords
 - Adjust your positioning based on their weaknesses
-

Pro Tips

1. Combine Multiple Data Points: Don't look at columns in isolation. Example:

- High traffic + Low reviews = Not converting visitors to customers (opportunity!)

- High hiring + High social mentions = Aggressive growth phase (threat!)
- Low speed + High traffic = You can outperform with faster site

2. Use Filters in Excel/Sheets:

- Filter by g_rating > 4.0 to find best-in-class
- Filter by traffic_estimate > 50000 to find major players
- Filter by hiring_signals > 0.7 to find growing competitors

3. Create Comparison Dashboards: Export key metrics for yourself vs. top 3 competitors:

Metric	You	Competitor A	Competitor B	Competitor C
Traffic	10K	50K	30K	75K
DA	25	45	35	60
Reviews	12	200	89	450

4. Set Up Alerts:

- Visit <https://www.talkwalker.com/alerts>
- Create alerts for each competitor name
- Create alerts for their top_keywords
- Get notified when they make moves

FAQ

Q: How often should I run the profiler? A: Monthly for active monitoring, quarterly for general awareness.

Q: Which columns are most important? A: For most businesses: g_rating, traffic_estimate, top_keywords, mention_count_total, domain_authority

Q: What if a competitor has no data in some columns? A: Common reasons:

- They don't have a Google Business Profile (g_* fields)
- They're not on social media (social fields)
- They're a new business (low backlinks, reviews)
- Website blocking (check robots_txt)

Q: How accurate is traffic_estimate? A: It's an estimate based on multiple signals. Use it for relative comparison, not absolute numbers.

Q: Can I track my own business? A: Yes! Search for your own business to benchmark against competitors.

Q: What's a "good" domain_authority score? A:

- 0-20: New/weak site
- 20-40: Established site
- 40-60: Strong site
- 60-80: Very strong site
- 80-100: Industry leader (rare)

*Q: How do I use the URLs in mention_urls_columns?** A: Click each URL to visit the site where they're mentioned. Read what people are saying about them.

Q: What should I do if a competitor has way better metrics? A: Focus on their weaknesses column. Find what they do poorly and excel there. Compete on service, not established authority.

Q: Can I export this data to other tools? A: Yes! The CSV works with Excel, Google Sheets, Tableau, Power BI, etc.

Next Steps

1. **Run your first search** - Start with your main business keyword + location
 2. **Sort by traffic_estimate** - Find your biggest competitors
 3. **Read the top 3 profiles** - Focus on their strengths, weaknesses, top_keywords
 4. **Set up alerts** - Use Talkwalker to monitor them
 5. **Create action plan** - Use the scenario guides above
 6. **Re-run monthly** - Track changes over time
-

Need Help?

- Review this guide whenever you're analyzing competitors
- Each column has a specific use case - refer to the category sections
- Use the scenario guides for step-by-step workflows
- Combine multiple data points for deeper insights

Remember: This tool gives you intelligence. What you do with it determines your success. Focus on competitors' weaknesses, track their growth, and stay one step ahead.

Last Updated: February 2025 Version: 2.0 - Now includes Keyword Intelligence & Mention Tracking
