

# COMPETITOR PROFILER - QUICK REFERENCE CARD

*Print this for easy reference while analyzing competitors*

---

## QUICK START (5 Steps)

1. Run profiler with your search query
  2. Sort CSV by `traffic_estimate` (find biggest competitors)
  3. Read `top_keywords` (what they focus on)
  4. Check `g_rating` + `mention_count_total` (reputation)
  5. Visit `mention_urls_*` (see what people say about them)
- 

## MOST IMPORTANT COLUMNS (Top 15)

| Column                                                                                                               | What It Means        | Quick Action                      |
|----------------------------------------------------------------------------------------------------------------------|----------------------|-----------------------------------|
|  <code>traffic_estimate</code>    | Monthly visitors     | Higher = bigger competitor        |
|  <code>g_rating</code>            | Google star rating   | Under 3.5 = steal their customers |
|  <code>top_keywords</code>        | What they rank for   | Create content on these topics    |
|  <code>mention_count_total</code> | Web mentions         | Higher = more brand awareness     |
|  <code>domain_authority</code>    | SEO strength (0-100) | Over 40 = strong, under 20 = weak |
|  <code>g_reviews</code>           | Number of reviews    | More = more established           |
|  <code>address</code>             | Physical location    | Same city = direct competitor     |
|  <code>emails</code>              | Contact emails       | Sign up for their newsletter      |
|  <code>phones</code>              | Phone numbers        | Mystery shop their sales process  |
|  <code>backlinks</code>           | Links to their site  | More = harder to outrank          |
|  <code>hiring_signals</code>      | Growing? (0-1)       | Over 0.7 = they're expanding      |
|  <code>top_phrases</code>         | Key 2-word phrases   | Their marketing messages          |

| Column                                                                                                        | What It Means        | Quick Action                    |
|---------------------------------------------------------------------------------------------------------------|----------------------|---------------------------------|
|  <b>mention_urls_news</b>    | News coverage URLs   | See their PR strategy           |
|  <b>mention_urls_reviews</b> | Review site URLs     | Read customer complaints        |
|  <b>page_load_speed</b>      | Site speed (seconds) | Under 3s = good user experience |
|                                                                                                               |                      |                                 |

## 5-MINUTE COMPETITOR ANALYSIS

### STEP 1: Basic Intel (30 seconds)

- Name, address, domain → Who are they?
- Traffic\_estimate → How big?
- G\_rating → How good?

### STEP 2: Market Position (1 minute)

- Domain\_authority → SEO strength?
- Backlinks → Hard to beat?
- Hiring\_signals → Growing?

### STEP 3: Content Strategy (2 minutes)

- Top\_keywords → What they talk about?
- Top\_phrases → Their messaging?
- Keyword\_density\_top5 → Main focus?

### STEP 4: Reputation (1 minute)

- G\_reviews count → Established?
- Mention\_count\_social → Social buzz?
- Mention\_count\_reviews → Customer feedback?

### STEP 5: Weaknesses (30 seconds)

- G\_rating under 3.5? → Poor service
- Page\_load\_speed over 4s? → Slow site
- Low social presence? → Not marketing well

---

## 💡 SCORING SYSTEM

### Threat Level Calculator

Add points for each:

- Traffic over 50K: +3 points
- Domain Authority over 40: +3 points
- G\_rating over 4.0: +2 points
- Hiring\_signals over 0.7: +2 points
- Mention\_count over 100: +2 points
- Same city/region: +2 points

### Total Score:

- 0-3: Weak competitor (easy to beat)
- 4-7: Moderate competitor (study them)
- 8-10: Strong competitor (major focus)
- 11+: Dominant competitor (long-term strategy)

---

## 🚩 RED FLAGS (Immediate Action Needed)

| Red Flag                    | What It Means            | Your Move                          |
|-----------------------------|--------------------------|------------------------------------|
| Their traffic > 3x yours    | They dominate the market | Niche down or differentiate        |
| Hiring_signals > 0.8        | Rapid expansion          | Prepare for aggressive competition |
| Mention_count_news > 20     | Strong PR game           | Start your own PR outreach         |
| G_rating < 3.0              | Poor reputation          | Advertise your better service      |
| Top_keywords = your targets | Same SEO focus           | Need better/longer content         |

---

## GREEN LIGHTS (Opportunities)

| Opportunity          | What It Means      | Your Move                                |
|----------------------|--------------------|------------------------------------------|
| G_rating < 3.5       | Unhappy customers  | Steal them with better service           |
| Low mention_count    | No brand awareness | Easy to outmarket them                   |
| Page_load_speed > 4s | Slow website       | Beat them with faster site               |
| Low social presence  | Not on social      | Dominate social media                    |
| Few reviews          | New/unestablished  | Get more reviews to appear more credible |

## FREE TOOLS TO USE WITH THIS DATA

### 1. Google Alerts Alternatives:

- Talkwalker Alerts: <https://www.talkwalker.com/alerts>
- Set up for: competitor names + their top\_keywords

### 2. SEO Tools:

- Check their backlinks: <https://ahrefs.com/backlink-checker> (free)
- Analyze domain: <https://moz.com/domain-analysis> (free)

### 3. Review Monitoring:

- Google Alerts for "[competitor name] review"
- Visit URLs in mention\_urls\_reviews

### 4. Traffic Estimates:

- Verify with: <https://www.similarweb.com> (free)

## COMMON USE CASES

**USE CASE 1: Steal Their Customers** → Read: g\_rating, mention\_urls\_reviews → Find: Their weaknesses in reviews → Do: Advertise that you solve those problems

**USE CASE 2: Outrank in SEO** → Read: top\_keywords, domain\_authority, backlinks → Find: Keywords they rank for → Do: Create better content + build links

**USE CASE 3: Monitor Growth** → Read: traffic\_estimate, hiring\_signals → Track: Monthly changes → Do: Adjust strategy if they're growing fast

**USE CASE 4: Content Ideas** → Read: top\_keywords, top\_phrases → Find: Gaps in your content → Do: Create content on those topics

**USE CASE 5: Partnerships** → Read: domain\_authority, traffic\_estimate → Find: Strong players in complementary niches → Do: Reach out via emails/phones for referral deals

---

## EXCEL/SHEETS TIPS

### Sort by these to find:

- Biggest competitors: Sort by `traffic_estimate` (descending)
- Best reputation: Sort by `g_rating` (descending)
- Growing fast: Sort by `hiring_signals` (descending)
- SEO leaders: Sort by `domain_authority` (descending)
- Most mentioned: Sort by `mention_count_total` (descending)

### Filter to find:

- Local competitors: Filter `address` contains your city
- Poor service: Filter `g_rating` < 3.5
- Growing companies: Filter `hiring_signals` > 0.7
- High traffic: Filter `traffic_estimate` > 50000

### Create Pivot Tables for:

- Average metrics by location
  - Traffic distribution
  - Rating distribution
  - Social media adoption rate
- 

## MONTHLY ROUTINE (15 Minutes)

**Week 1:** Re-run profiler, note changes in traffic/reviews **Week 2:** Visit `mention_urls`, read new content about

them **Week 3:** Check their social media, note new campaigns **Week 4:** Update your strategy based on their moves

---

## ? QUICK FAQs

**Q: What's a good domain authority?** A: 20-40 = established, 40-60 = strong, 60+ = very strong

**Q: How accurate is traffic\_estimate?** A: Use for relative comparison, not absolute numbers

**Q: Which columns matter most?** A: Traffic\_estimate, g\_rating, top\_keywords, domain\_authority, mention\_count\_total

**Q: How often to run this?** A: Monthly for active monitoring, quarterly for general awareness

**Q: What if lots of data is missing?** A: Common for new businesses or sites that block scrapers

---

## YOUR ACTION PLAN

### Today:

- ☐ Run profiler for your main keyword
- ☐ Identify top 3 competitors (by traffic)
- ☐ Read their top\_keywords
- ☐ Check their g\_rating and reviews

### This Week:

- ☐ Set up Talkwalker alerts for competitor names
- ☐ Visit mention\_urls\_reviews to read feedback
- ☐ Create content targeting their top\_keywords
- ☐ Improve areas where they have low ratings

### This Month:

- ☐ Build backlinks to beat their domain\_authority
  - ☐ Get more Google reviews to match their g\_reviews
  - ☐ Post on social media if they're not active there
  - ☐ Re-run profiler to track changes
-

## REMEMBER

### **Success Formula:**

1. Know your competitors (this tool)
2. Find their weaknesses (reviews, ratings, gaps)
3. Do what they do poorly, better
4. Monitor monthly to stay ahead

### **You can't beat everyone, so:**

- Focus on top 3-5 competitors
- Exploit their specific weaknesses
- Don't try to compete where they're strongest
- Find your unique advantage
